Subject: Elwin Wong Promoted to Director of Information Security

I am pleased to announce that Elwin Wong has been promoted to Director of Information Security, reporting directly to me. In this position, Elwin will oversee the Risk Management, Compliance, and Security Operations teams in Information Security. Additionally, he will be engaging in development of the strategic roadmap for security along with driving several IT enterprise risk initiatives. Elwin has over 10 years of experience leading Security and Infrastructure environments. In addition to holding leadership positions in security at Safeway, Elwin has held other leadership positions at EDS and Commerce One.

In his 7 years at Safeway, Elwin has led a number of significant efforts from implementing continuous management of security controls to safeguard Safeway's environment and ensuring that Safeway meets compliance with PCI, SOX, and other regulatory requirements.

Elwin joined Safeway in 2004 and was promoted to Manager of the Risk Management team in 2006 where he led the development of the risk management program. Furthermore, he led the SOX compliance efforts on behalf of Information Security to reduce overall compliance cost and resource utilization while improving effectiveness of security controls. In 2010 Elwin was promoted to Sr. Manager of Risk Management and IT Compliance. In this expanded role he took over all IT compliance responsibilities and led the team to significantly streamline the PCI audit efforts which resulted in a reduction of PCI compliance spend by over 50%.

Please join me in congratulating Elwin.
